## Easy Add-On Makes Wire Management Simple

**ST. LOUIS** – The new Cooper Magnum<sup>®</sup> TS Series offers a finger-safe alternative to traditional double-row terminal blocks. The compact size saves valuable space in tight applications, and built-in screw holes make mounting easy.

Wide amp and wire ranges are available in ratings of 20-50A and 22-8 AWG (solid or stranded conductors) for maximum versatility. There is no need to stock traditional terminal blocks in all of the various pole configurations. Distributors can consolidate inventory because the TS Series comes in strips of 12 terminals that can be cut to the exact number of poles for a job.

Available in 600V ratings, the Cooper Magnum TS Series terminal blocks are UL, CSA and CE Certified.

For more information about Cooper Magnum TS Series terminal blocks, visit [www.cooperbussmann.com](http://www.cooperbussmann.com).
